Kiln dried before and after treatment

Rated for ground contact & salt water spray

Our high quality Southern Yellow Pine timber is imported direct from the U.S.A. BetterDeck®, the first and only supplier of this high-quality pressure treated timber in the Irish market today, reassuring our customers that the BetterDeck® name is the leader in our industry. All our timber is sourced from sustainable forests in North America.

### Southern Yellow Pine

Our professional grade timber is known for its strength and density, means it can span wider widths without support (strength Class C24) and absorb half the amount of moisture when compared to other softwood timbers.

### MicroPro® Treatment

The revolutionary MicroPro® preservative is a non-toxic, Eco-friendly preservative. Our pressure- treated timber has 100% penetration of the MicroPro preservative, which gives a rating for ground contact. (Use class 4+)

# Hidden Fastener System

DeckPlank Fasteners

## CONCEALoc®

When using grooved-edge boards, our hidden deck fastening system installs between the deck boards, fastening them to the joists with no visible deck screw heads on the walking surface.

This precision also created perfectly consistent spacing between the boards for a flawless look across the entire deck.

## TOPLoc™

**TOPLoc™** screws are specifically designed for our deck boards - they eliminate the 'mushrooming' effect that standard decking screws cause when used with composite wood materials.

We recommend pre-drilling a 4mm pilot hole to give the neatest finish around the screw head.
